Medical Fraud Case-Solved By ESDA

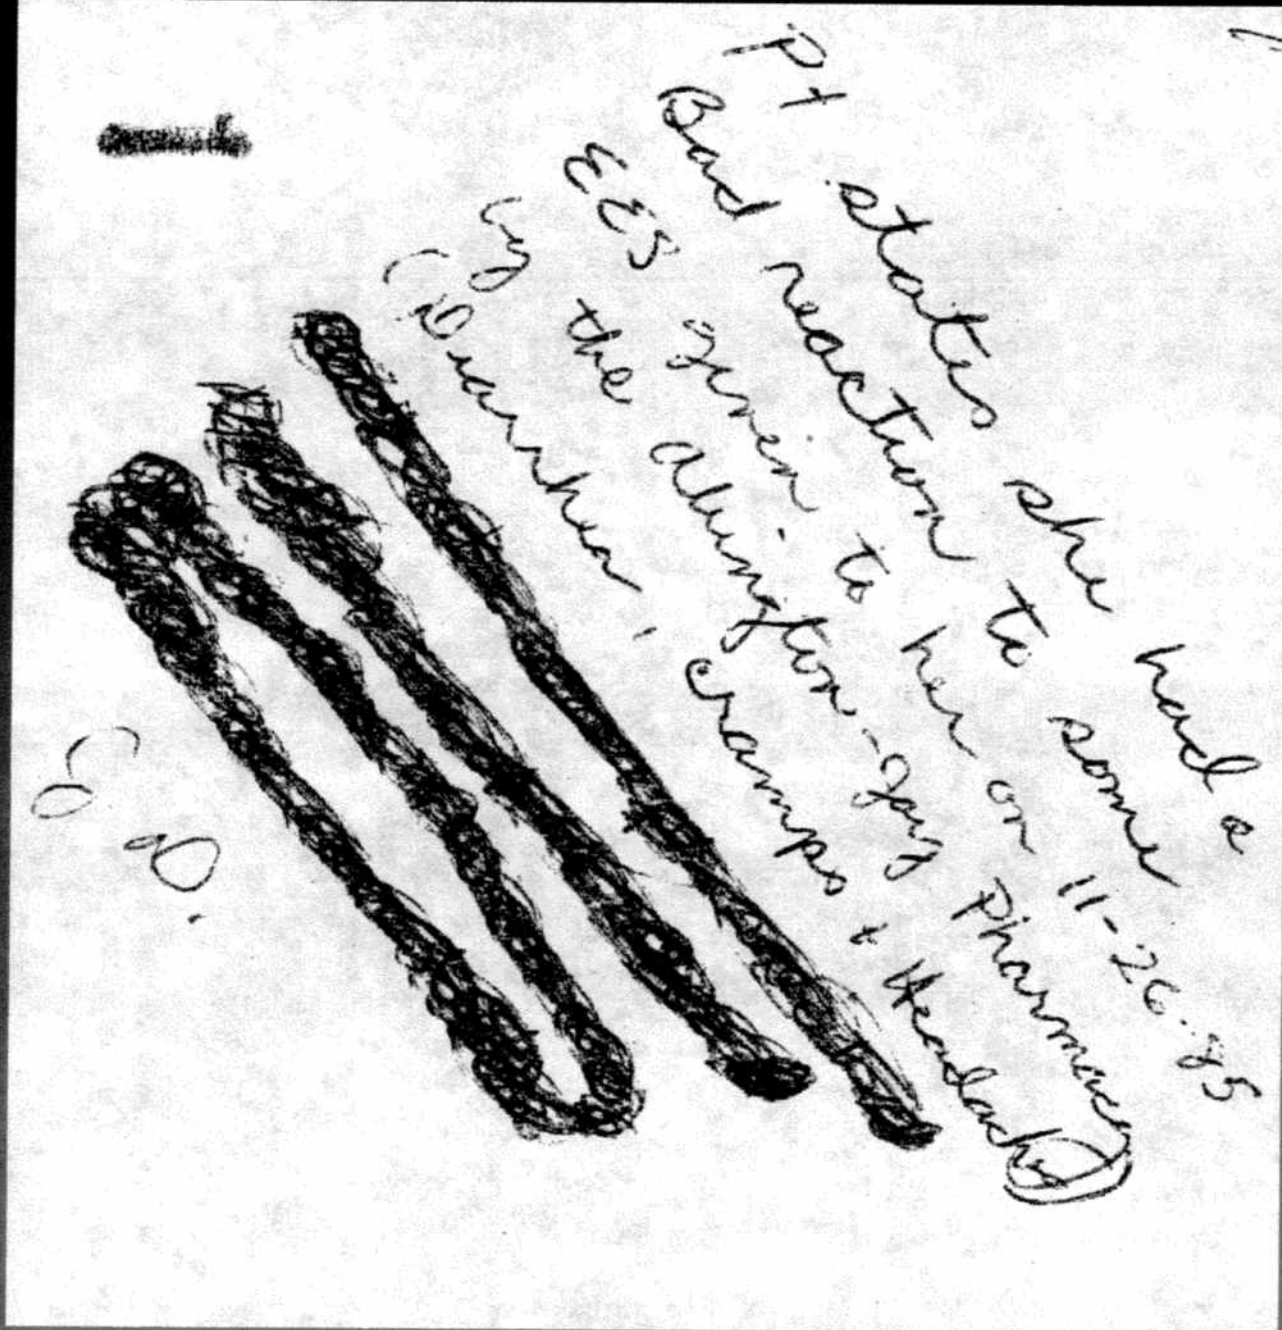

On August 18, 1998 the plaintiff's attorney sent a letter to the defendant's attorney requesting all original medical records of the patient.

We performed an ESDA examination on this letter and found the impressions noted to the right (slanted) impressed into the 1998 letter. These impressions were those of the purported "original" 1997 medical records.

When notified of the lawsuit, the doctor had rewritten the entire medical record and used the letter as a "backer".
